1925 S. Coronado Rd.
Apt 2037 Gilbert,
Arizona

Skills & Competences

- C/C++
- JavaScript
- Python
- Visual Basic (macro programming in excel)
- Microsoft office
- HTML
- CSS
- Express Server
- SQL
- NoSQL
- Webpac
- React hooks
- Node
- Bootstrap
- Handle bars
- Connection
- Body-Parser
- MongoDB
- Robo-3T
- Sequelize

Languages

English
Native or Bilingual

Farsi, Hindi, Pashtu, Sign
Language
Intermediate

Extracurricular activities/ Organizations

Muslim American Society
(teaching kids Arabic,
educating children on the
teachings of the Quran,
Organizing events) |
Event Planner (Planned
birthdays, office events,
weddings)

Education

■ Coding bootcamp

University of Arizona, Expected to Graduate: November 2020

■ Computer Science B.S.

Arizona State University, Graduated: December 2010

Professional Experience

12/2009 - Present

■ Accounting Specialist

Adam Travel
Chandler, Arizona

Tasks

Prepared monthly accruals, prepared and analyzed balance sheets, handled physical inventory counts, maintained payroll information, Prepared and made bank deposits

UofA Computer Science Projects/Coursework

■ Burger App:

- Created a burger logger using MySQL, Node, Express, Handlebars and homemade ORM
- Used Node and MySQL to query and route data in the burger app
- Generated HTML using handlebars

■ Restaurant Finder App:

- Designed an application that is able to locate restaurants in close proximity of the user
- The additional features the app contained were the restaurant rating, phone number and menu
- Used CSS, HTML and bootstrap for the front-end design of the app
- JavaScript and jQuery were used for the data entry

■ Employee tracker:

- Designed a database schema containing three tables for departments, roles and employees
- The database was created using Node, express server, express-handlebars, connection and JQuery
- The functional application of the database is to add and update employee roles and departments

■ Yoga App:

- Designed an app that provides customized yoga plans based off of the user's preference
- Implemented the design using several different technologies such as sequelize and passport
- Used Bcryptjs to ensure user privacy
